Project Overview

New Cairo capital city is located 35 KM east of Cairo of a total area of 170,000 feddan. The new capital city lies between the regional ring road, the Cairo-Suez road and Cairo-El Ain El Sokhna road.

The new capital city will help to strengthen and diversify the country’s economic potential by creating new places to live, work and visit. In order to draw people to this new capital city, a series of key catalyst developments will be established at its core. This will include a new government administrative district, a cultural district and a wide variety of urban neighbourhoods.

The project comprises 59 prototypes of residential buildings, including a commercial ground floor in some buildings, and each cluster accommodates a number of buildings’ prototypes sharing a common basement dedicated for parking spaces. In addition, the project contains four prototypes of villas and townhouse units, as well as various ancillary buildings, including schools, mosques, a hospital, family health clinic, sports club, police station, civil defense center, and a post office. Moreover, the project has open landscape areas between buildings and clusters as well as a shared landscape courtyard in the middle of each cluster with access from the ground floor units. In addition, some buildings overlook the Green River which is the main landscape spine of the New Capital as well as the CBD and the Iconic Tower.

Location

The project is located in the center of the new capital, overlooking the CBD and Green River. The project stretches over an area of approximately 960 feddans divided into a series of typical, interrelated blocks of diverse vernacular to break stereotypical monotony. The project mimics the distinct urban patterns of Paris and Khedivial Cairo. Different architectural styles of that era are used in each cluster to add diversity and character to the project and adding to the authentic experience of Khedivial Cairo.
